Mortierella Alpina Oil: A Source of ARA

Schizochytrium Sp. Oil: A Source of DHA

Preparation & Storage

Use as directed by a doctor.

Your baby's health depends on carefully following these preparation, use & storage instructions. Failure to do so could result in severe harm.

Ask baby's doctor about using infant formula and the need for boiling water or sterilizing bottles and utensils. Powdered infant formulas are not sterile and should not be fed to premature infants or infants who might have immune problems unless directed and supervised by your baby's doctor.

- Wash hands & clean all utensils and surfaces. If boiling water for formula, bring to a rolling boil for 1 minute and let cool to room temperature.
- Referring to Mixing Guide, measure & pour water into clean bottle, then use enclosed scoop to add powder. Tightly cover can.
- Mix until powder is completely dissolved. Feed immediately; discard any formula left after 1 hour.

Mixing Guide

To make approximately:

- 2 fl oz bottle:** 2 fl oz water + 1 unpacked level scoop (8.9g)
- 4 fl oz bottle:** 4 fl oz water + 2 unpacked level scoops
- 6 fl oz bottle:** 6 fl oz water + 3 unpacked level scoops
- 8 fl oz bottle:** 8 fl oz water + 4 unpacked level scoops

Note: If not feeding right away, refrigerate prepared bottle at 35-40°F (2-4°C); use contents within 24 hours. **Do not use a microwave to warm formula, as serious burns may occur.**

Storage: Use contents within 1 month of opening. Store opened and unopened cans in a cool, dry place; avoid extreme temperatures. Some settling may occur in shipping.

Great formula

a year ago

The first thing I noticed about Dr. Brown's Soy-Ease pro when I opened it was that it seemed a bit more prone to clumps than the formula I usually use. This made mixing it more difficult and take a bit longer. However, that didn't seem to matter to my little one because he had no problem completely finishing off the bottles that we provided him with this formula. I appreciate the design of the scoop which is more ergonomic and feels more solid than the scoops found in the containers of the leading brands. Thank you influenster for sending this over for us to try.

Tasty

a year ago

Dr. Brown's Soy-Ease Pro is a milk- and lactose-free formula designed for babies with sensitive tummies or those who experience fussiness and gas due to lactose or milk protein sensitivity. It features 100% plant-based proteins, offering a gentle and complete nutritional solution for infants. This formula is ideal for parents seeking an alternative to dairy-based formulas, ensuring that their baby receives essential nutrients without compromising on digestion. Its easy-to-digest composition makes it a great choice for sensitive little ones.

Nice

a year ago

I use Dr. Brown bottles for my baby. I was very surprised when I found out that they also do formulas. My baby seems to like this product. It does not exacerbate any tummy issues. My baby seems less gassy and fussy being on this. The scent is not pungent like the other brands. The packaging is convenient with they reusable lead. The texture is smooth and dry and soft very easy in water. The final product is smooth and not as bubbly and seems very creamy just like the other dairy formulas.

Great infant formula

a year ago

Finding out my son is lactose intolerant gave me a bit of anxiety because I wasn't sure that I was going to find a good formula for him with the essential nutrients that he needs to grow. I am so thankful for Dr. Brown's soy-ease pro formula because it's so gentle on his tummy and provides all of the essential nutrients that he needs as a growing infant. We didn't have any problems with him accepting it and it was such a smooth and easy transition.

Soy ease formula for babies

a year ago

This formula is perfect for my triplets. It is milk & lactose free. It's super easy to use. I love that it is 100% plant based proteins in it. It will definitely help with my babies fussiness and gas problems. This has been a game changer in feeding them. I'm so glad I was able to try this. Love this brand and never disappoints. I'll definitely be purchasing more after this! Thank you for the great formula. Highly recommend.

Soy-based formula for the sensitive little tummy

a year ago

Great soy-based infant formula that is easy on the little one's stomach. My baby is not allergic to cow milk based formula, but preferred this one when he wasn't feeling too well. Dr Brown's is a trusted baby brand so I was thrilled to find out they make formula! Must taste good since it's baby approved.

Good

a year ago

Soy milk made with close to 100% plant proteins helps a lot to prevent our babies from having gas and if your baby is lactose intolerant, this milk will definitely help, it has a good flavor and a very good texture.

Good

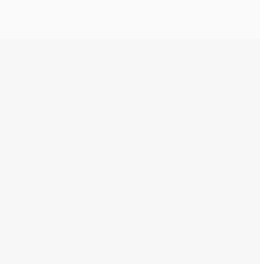

a year ago

Good ingredients, the presentation looks very tender, good texture and apparently my baby liked it. It smells like it should smell. I don't like to recommend this type of product because the mother should see that.

Answer This Question

A: Hi! Thank you for your question. We take these matters very seriously as the safety of our products and our consumers is our number one priority. All of our infant formula is produced in several months. We are working actively to make this product available as soon as possible. In the meantime, we have alternative infant formula Soy products available which you can choose from by visiting <https://store.brownformula.com/formula-soy> to see all retailers that carry all of our products. We are doing everything to expedite delivery of product through our supply chain. Please know that we are working tirelessly, in partnership with Health Canada, our factories, and our retail partners to minimize the disruptions and ensure future supply reliability.

Answer This Question

A: Hi! Thank you for your question. The Soy-ease Pro formulation of Good Start 1 Dr. Brown's is different from Gerber Good Start Gentle Soy and Good Start Alsos. Nevertheless, both formulations continue to provide complete nutrition for babies that are sensitive to milk and lactose. Soy-ease Pro still uses soy protein like Gerber Good Start Gentle Soy and Good Start Alsos. We are focused on ensuring that our products continue to be readily available for you at your local retailer. We are doing everything to expedite delivery of product through our supply chain. Please know that we are working tirelessly, in partnership with Health Canada, our factories, and our retail partners to minimize the disruptions and ensure future supply reliability.

Answer This Question

A: Hi Smborgie2777, thank you for reaching out and we understand your frustration. Unfortunately, we anticipate that Good Start Gentle Soy will continue to have extended inventory disruptions for several months. We are working actively to make this product available as soon as possible. In the meantime, we have alternative infant formula Soy products available which you can choose from by visiting <https://store.brownformula.com/formula-soy> to see all retailers that carry all of our products. We are doing everything to expedite delivery of product through our supply chain. Please know that we are working tirelessly, in partnership with Health Canada, our factories, and our retail partners to minimize the disruptions and ensure future supply reliability.
