

ELECARE®

Supports growth of infants 0-12 months

EleCare is a nutritionally complete amino acid-based formula for infants with food allergies or GI conditions. It's hypoallergenic and clinically shown to support the growth of exclusively formula-fed infants.^{1,*} The protein source is comprised of 100% free amino acids and has DHA/ARA to help support brain and eye development.

Mixing Instructions

Instructions for Use:

Your baby's health depends on carefully following these directions. Proper hygiene, handling and storage are important when preparing infant formula. Failure to follow these directions could result in severe harm. Ask your baby's doctor if you need to use cooled, boiled water for mixing and if you need to boil (sterilize), bottles, nipples and rings before use.

Wash your hands, surfaces and utensils. Pour desired amount of water into clean bottle (see Powder Mixing Guide).

Add 1 unpacked level scoop (9.4 g) to each 2 fl oz of water; return dry scoop to can.

Cap bottle; shake well; attach nipple. Once feeding begins, use within 1 hour or discard.

Never use a microwave to warm formula. Serious burns can result.

Storage & Handling

Instructions for Use:

- Once mixed, store bottles in refrigerator and feed to baby within 24 hours.
- Store unopened or opened container at room temperature; avoid extreme temperatures.
- Use opened can contents within 1 month.

Powder Mixing Guide

Measure water	Add scoop(s) of unpacked, level powder using enclosed scoop
2 fl oz	1 scoop (9.4 g)
4 fl oz	2 scoops (18.8 g)
6 fl oz	3 scoops (28.2 g)

Each scoop adds about 0.2 fl oz to the amount of prepared formula.

Nutrition Facts: 100 Cal (5 fl oz prepared as directed)
