

HOME / GOAT INFANT FORMULA 28.2OZ (0-12 MONTHS)

★★★★★ 500 reviews

## Goat Infant Formula 28.2oz (0–12 months)

800g | 0 - 12 months | \$44.99 per can

Our unique recipe is made with creamy Whole A2 Goat Milk and Goat Whey. The A2 proteins in goat milk form smaller, softer casein curds (similar to breast milk). For infants experiencing digestive discomfort such as constipation, gassiness, and reflux, using goat milk formula may reduce the likelihood of these symptoms occurring, making it a natural alternative for infants with sensitive tummies. Our Goat milk formula has no palm oil, no added soy, and no corn syrup. It is further enriched with GOS and plant-Based DHA & ARA.

Our Goat formula is suitable from birth.

Please consult your can of formula or the website of the retailer you purchased the formula from for most up to date nutritional information.

An update for our Kendamil families. [Learn more here.](#)

O A Vegetarian Source of Arachidonic Acid

α A Source of Folate

## key ingredients

Whole Milk with MFGM

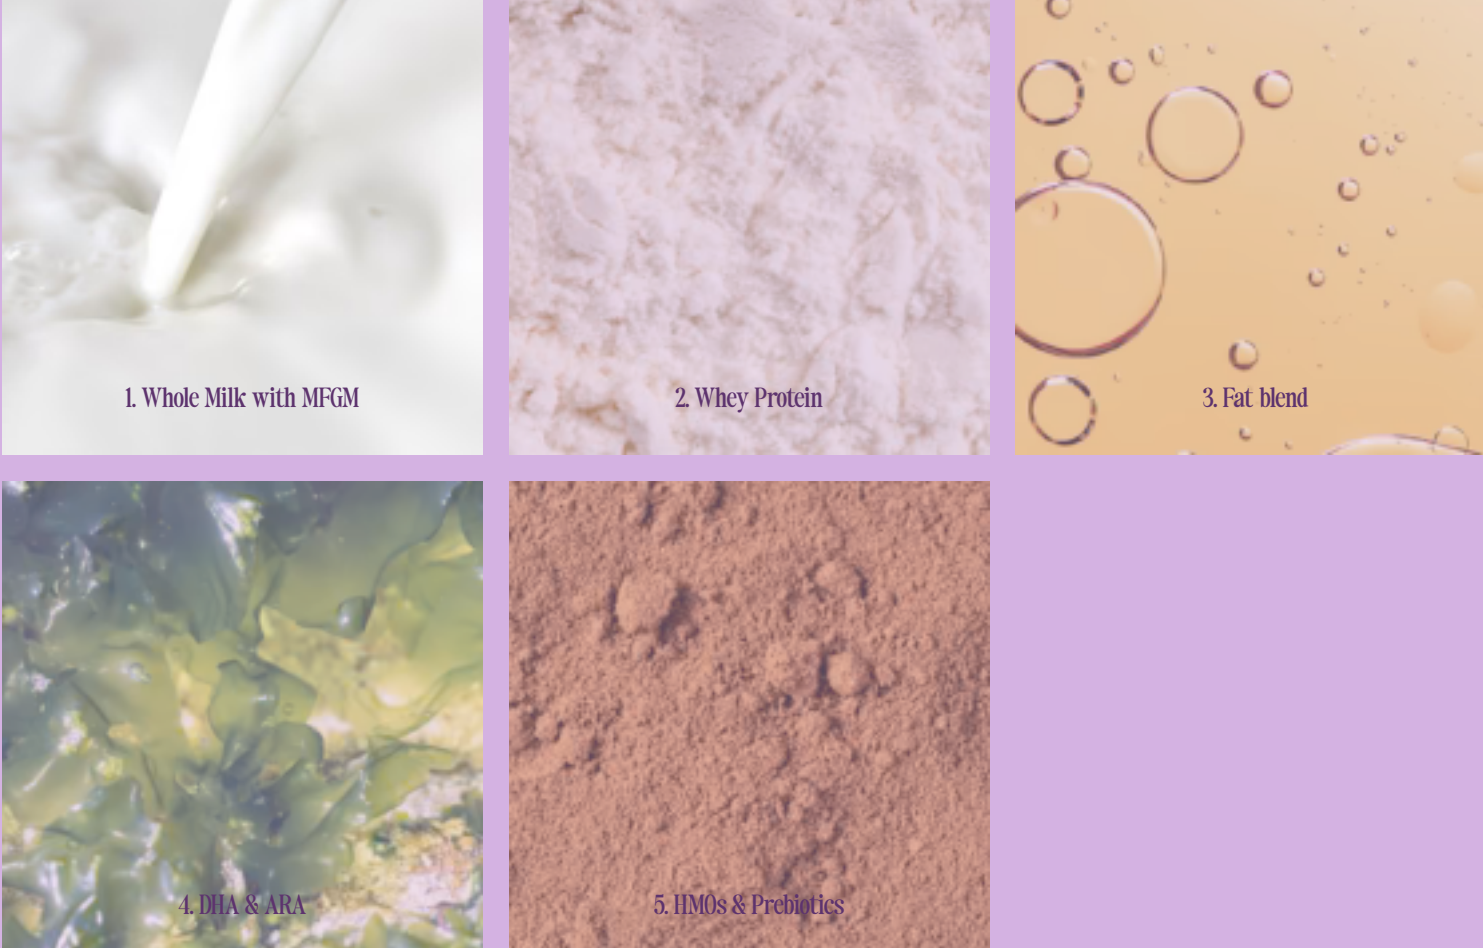

Whole Goat's Milk is the first ingredient in our goat formula recipes and is sourced from European goat farms. Our use of whole goat's milk provides a naturally creamy taste to our recipe and crucially means we can use reduced levels of vegetable oils, which typically form 100% of the fat content in other formula brands. The A2 proteins in goat milk form smaller, softer casein curds, promoting gentler digestion. For infants experiencing digestive discomfort such as constipation, gassiness, and reflux, using goat milk formula may reduce the likelihood of these symptoms occurring, making it a natural alternative for infants with sensitive tummies.

## Customers say

🌟 AI-generated from customer reviews.

Goat Infant Formula 28.2oz (0-12 months) is a natural alternative for infants with sensitive tummies, made with creamy Whole A2 Goat Milk and Goat Whey. It is praised for its ability to reduce digestive discomfort such as constipation, gassiness, and reflux. The formula is enriched with GOS and plant-based DHA & ARA, and it contains no palm oil, added soy, or corn syrup.

### Absolutely disappointed

I wrote a 5 star review not long ago. My girl used Kendamil goat for a month and was doing amazing finally. After that she started to go backwards and getting worse and worse with her reflux. Just to find out they decided to add cow milk to this formula. Why even advertise it as a goat milk formula..... [Read more](#)

### Amazing

My daughter doesn't spit up any of this. Very easy on her stomach no fuss no excessive gas

### Forever a Kendamil family

Where do I even begin. Our baby was diagnosed with cmpa at 2 months. We tried everything including amino acid formula. Our baby was not happy- looked unhealthy and was in pure pain from amino acid formula. After having enough of the formula game here in the United States, we decided to give Kendamil...

### PSA CMPA AND CMPI MOMS

KENDAMIL IS NOW PUTTING COWS MILK IN THEIR GOATS MILK FORMULA. This is extremely upsetting for moms that have littles with CMPI where they can tolerate goats milk but cannot have cows milk. They switched up the ingredients list and the new can looks identical on the front (only saying goat). We chec... [Read more](#)
