Reviews summary

★★★★☆ (4.5)

Pros

- Rich in nutrients: Provides essential vitamins and minerals for growth.
- Smooth mixability: Mixes without clumping or foam.
- Similar to name brands: Formula contains comparable ingredients to well-known brands.
- Minimal spit-up: Reduces spit-up in most babies during feeding.
- High-quality formula: Offers at a lower cost compared to name-brand formulas.

Cons

- Strong fishy smell: Formula has a potent odor in the canister.

About this item

Product details

Compare to the nutrition of Similac Pro-Advance Infant Formula. Crafted to be closer to breast milk, and enhanced with double the HMOs versus our prior single HMO formula, Parent's Choice Advantage Premium Infant Formula Milk-Based Powder with Iron provides complete nutrition for babies 0-12 months. HMOs are immune supporting prebiotics commonly found in breast milk, and the dual HMOs in this baby formula, LNnT and 2'-FL, support immune system and digestive health by aiding the growth of beneficial bacteria in baby's digestive tract. DHA, Lutein and Vitamin E are included for brain and eye development. To help promote calcium absorption for strong bones, this formula does not contain palm olein oil. Non-GMO, ingredients genetically not engineered, and this baby formula also has no artificial growth hormones. Certified Kosher by the Orthodox Union - OU-D. No significant difference has been shown between milk derived from rbST-treated and non-rbST-treated cows. HMOs: Human Milk Oligosaccharide (HMO); not from human milk. This product is not manufactured or distributed by the owner of the registered trademark Similac Pro-Advance. Parent's Choice Advantage Premium Infant Formula does not contain the identical proprietary ingredient blend of prebiotics, patented levels of nucleotides, lutein and lycopene in Similac Pro-Advance.

Directions

Instructions

DIRECTIONS FOR PREPARATION AND USE: Your baby's health depends on carefully following these preparation, use and storage instructions. Failure to follow these instructions could result in severe harm. Powdered infant formulas are NOT sterile and should NOT be fed to premature infants or infants who might have immune problems unless directed and supervised by your baby's doctor. Ask your baby's doctor about the need to boil or sterilize water for formula and the proper preparation of bottle and feeding utensils. 1. Clean container top before opening. Wash hands, bottle and feeding utensils in hot soapy water prior to preparing formula. 2. Pour desired amount of warm water (approx. 100˚F/40˚C) into clean bottle. (See Feeding Chart). 3. Add powder to water. 4. Cap bottle and shake well until powder is dissolved. Feed immediately. Discard any remaining formula in bottle after 1 hour from start of feeding. STORAGE: Prepared formula, that has not been used for feeding, should be stored within 2 hours of preparation in the refrigerator at 35-40˚F (2-4˚C); use within 24 hours. Warm infant formula to room temperature and shake well before feeding. Store container (opened or unopened) in a dry area at room temperature. Reclose the opened container tightly with plastic cap; use contents within 1 month. DO NOT FREEZE. Avoid any extreme temperatures. USE BY DATE ON BOTTOM OF CONTAINER.

Safe Handling Instructions

Warning: do not use microwave to prepare or warm formula. Serious burns may occur.

Excellent alternative to Similac 360 w/iron

I originally went to order Similac 360 W/iron 2 cans the same size.. I would of paid 130.00 I spoke to my daughters pediatrician and they told me that these were exactly the same formula and I can buy them as a replacement. 2Of the large cans cost me $63.00

Similac Switch

Switched from Similac total 360. This product is the exact same half the piece and almost double the volume. Baby didn't even notice a difference! Great find, wish I found it sooner!

★★★★★ **Verified Purchase**

Excellent

This formula is the same as the big name brands, for a fraction of the cost. This sensitive formula is working great for our 7 month old who seems to flare up with normal formula.
